1 Summary

1.1 The Raspberry Pi Foundation

The Raspberry Pi Foundation is a charity founded in 2009 to promote the study of basic computer science in schools, and is responsible for developing a single-board computer called the Raspberry Pi, UK's best-selling PC of all time.

The foundation is supported by the University of Cambridge Computer Laboratory and Broadcom. It's aim is to « promote the study of computer science and related topics, especially at school level, and to put the fun back into learning computing ».

1.2 The Raspberry Pi

The Raspberry Pi is a series of credit card-sized single-board computers developed in England, United Kingdom by the Raspberry Pi Foundation with the intent to promote the teaching of basic computer science in schools and developing countries.

Several generations of Raspberry Pi's have been released. The first (Pi 1) was released in February 2012 in basic model A and a higher specification model B. A+ and B+ models were released a year later. Raspberry Pi 2 model B was released in February 2015 and Raspberry Pi 3 model B in February 2016. These boards are priced between 20\$ and 35\$. A cut down compute model was released in April 2014 and a Pi Zero with smaller footprint and limited IO (Input/Output) capabilities released in November 2015 for 5\$!!!

2 The Raspberry Pi Foundation

2.1 Introduction

2.2 History

2.2.1 Co-founder

2.2.2 Collaboration

2.3 Why the Raspberry Pi

2.3.1 The idea behind

2.3.2 Interaction with computers

2.4 Logo

3 The Raspberry Pi

3.1 Introduction

3.1.1 What is it ?

3.1.2 Where does he come from ?

3.1.3 Feature

3.1.4 Operating system

3.2 Hardware

3.3 Overclocking

3.3.1 What is it ?

3.3.2 Why should we overclock ?

3.3.3 The risk behind the overclocking

3.3.4 Heat sink or not ?

3.4 Networking

3.5 Software

3.5.1 OS

3.6 Alternatives

3.6.1 BeagleBoard

3.6.2 Arduino ?

4 Projects

5 Vocabulary

- Son objectif → It's aim
- Un architecte de système sur puce → a system-on-chip architect
- Abordable → Affordable
- Concerner → To concern
- D'année en année → Year-on-year
- Appliquer → Applying
- Une série d'ordinateur de bord unique au format carte de crédit → A series of credit card-sized single-board computers
- Pays en voie de développement → Developing countries
- Entrée / sortie → Input/Output (IO) (GPIO)
- Grossièrement → Roughly
- Dissipateur thermique → Heatsink
